

INVITATION FOR A DEMO ON THE IFRS 17 ENGINE

Dear Esteemed Client,

We are delighted to extend an invitation to your esteemed team for a session on our IFRS 17 Software demo. This software has proven to be highly beneficial for numerous insurance clients across Africa.

The IFRS 17 Standard has introduced a higher level of granularity compared to IFRS 4. Consequently, each insurer should consider adopting a system for optimal efficiency. With over two decades of experience in providing actuarial advice, we understand the unique needs of insurers, extending beyond IFRS 17. Therefore, we have developed a comprehensive software that seamlessly integrates with most underwriting platforms and effortlessly generates IFRS 17 figures.

KEY MODULES INCLUDE;

- 1 Generation of periodic disclosures
- 2 Calculation of risk adjustments
- 3 Computation of the discounting component
- 4 Determination of CSM and loss component
- 5 Generation of diagrams for easy comparability
- 6 Generation of reports
- 7 Store previous runs/disclosures on the dashboard

We extend this invitation to the CEO, CFO, Finance Manager, Actuarial Team, IT Team, and any other relevant teams for the virtual system demo scheduled on **27th February 2024 at 10:00 am EAT**.

Kindly confirm your attendance by registering: [**CLICK HERE TO REGISTER NOW**](#)
